PROFIL

Experienced in management, product management, consulting, project management, and end-to-end process flow design, I focus on delivering high-quality solutions that drive growth and enhance user experiences. My approach combines strategic thinking, empathy, and technical precision to design impactful products and scalable processes. Today, I am deeply engaged in the field of Generative AI. I am continuously exploring and developing a strong understanding of how transformative AI will be for organizations. I actively invest time in learning, experimenting, and building practical expertise in this rapidly evolving domain.

What I'm looking for:

Opportunities where I can contribute to designing and optimizing business architecture, improving enterprise processes, and driving product or operational excellence.

I'm particularly interested in roles where I can combine product thinking, Agile project management, and technology exploration to deliver impactful solutions and support business transformation.

PROFESSIONAL EXPERIENCES

Accenture - Consultant — June 2022 - Present

Delivery Master/ Project Manager Product Costing - L'Oreal — **March 2026 - Present**

- Led the delivery of SAP Product Costing solutions within global transformation programs, ensuring alignment with business objectives, timeline, and budget.
- Coordinated cross-functional teams including business stakeholders, SAP functional consultants, and technical teams to ensure successful project execution.
- Managed the end-to-end project lifecycle, including planning, solution design, build, testing, deployment, and hypercare phases.
- Monitored project risks, issues, and dependencies, providing mitigation strategies and regular status reporting to program governance.
- Ensured quality delivery through adherence to project governance, documentation standards, and change management processes.
